

Loss Forecaster

RISK66's Loss Forecaster is an easy-to-use tool for forecasting property and casualty losses. It includes SIGMA's proprietary database of loss development and trending data, and its analyses use both incurred and paid methodologies.

Loss Forecaster Provides

- Loss Projections and Reserve Analyses using up to 15 historical policy periods
- Risk management due diligence evaluations
- Analyses to compare alternative loss financing methods
- Estimated loss payment schedules and net present value computations
- Analyses to help define retention levels and policy limits
- Recommendations for company mergers, acquisitions, or divestitures
- Detailed reporting on each step in the analytic process
- Graphical displays for historical ultimate loss estimates and pure loss rates
